

K-Love has been my radio station for some years now and I personally cannot imagine life without it. My daughter is at the critical age of 14 now and this is the one positive radio station that she can listen to. All the other stations have vulgar language either from the DJ's or the music. I know I share the same love for my station as hundreds of thousands of other people. Many of us have had critical situations in our lives that K-Love has been able to see us through by providing us with positive uplifting music as well as wonderful God fearing (loving) DJ's. I know that K-Love has saved many lives through their encouragement and their prayer when people thought that drugs or suicide were the only way. How many other stations can bring new hope to those whose lives were near over. Please please do not let this station be forced off the air.
